Word/PDF Document Creation

Exact Forms Plus!

Generate Microsoft Word or PDF Documents from your QuickBase application.

Highlights of: Exact Forms Plus!

- | | |
|--|--|
| ▶ No macros to download and install | Use your version of Microsoft Word as is to create your Document Templates. |
| ▶ Concepts similar to Exact Forms | Reference data to be displayed in the document as:
~3~ or ~Record ID#~. |
| ▶ Utilize QuickBase application tokens | Not readily available with native Exact Forms. |
| ▶ Create a persistent MS Word or PDF document | Instead of Exact Forms dynamic html pages. |
| ▶ Ability to save documents to a file attachment field or to Amazon S3 | Amazon S3 helps reduce file attachment space usage. |
| ▶ Use MS Word headers and footers in your documents | Include fields from your application in the Header or Footer. |
| ▶ Insert images right into your document template | Instead of uploading and storing them in a QuickBase table. |
| ▶ Email document as a file attachment or fax document | Additional automation to save extra steps and time. |
| ▶ Control formatting of sub-table data | Specify how wide each column should be, Bold/Underline/Italicize data, change font style and size for each cell... and more. |
| ▶ Multi-Record Transactions | Create multiple documents in one transaction. |
